## 2 . PURPOSE OF OPERIBUS TOKENIZATION

---

To provide access and participation in the decentralized financial system to all persons in the profits of OPERIBUS' major business, industrial, and infrastructure projects and developments.

---

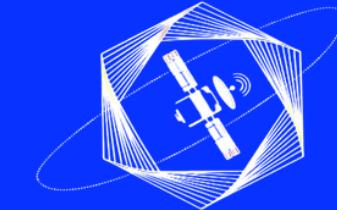

It opens the doors of OPERIBUS to third parties through a new decentralized business management model using blockchain technology, smart contracts, and security tokens.

---

## 3. EXPERIENCE

---

### PROUD OF OUR WORK

Supply, installation and commissioning of DVOR DOPPLER (very high frequency omnidirectional range) / DME (distance measuring equipment) for Buenaventura Airport.

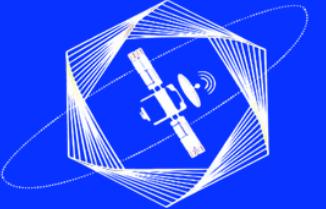

Supply, installation and commissioning of ILS (Instrument Landing System) for Armenia Airport.

Supply, installation, integration and commissioning of aeronautical meteorological systems and automatic surface weather stations (EMAS), wind system, runway visual range measuring equipment, cloud ceiling meters, for the airports of San Andrés, Rionegro, Bucaramanga, Cúcuta, Ipiales, Villavicencio, Manizales, Montería, Neiva and Quibdó.

---

### 3. EXPERIENCE

---

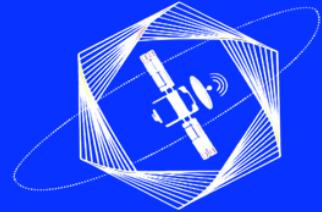

#### PROUD OF OUR WORK

Supply, installation and commissioning of the surface visual aids system, including the control and HMI systems in the Cat. 3 Control Tower at El Dorado Airport in Bogota D.C.

Repaving and leveling of the asphalt surface, including uninstallation, installation and commissioning of the surface visual aids system (beacon enhancement) at José María Córdova and Olaya Herrera airports in Medellín.

---

## 3. EXPERIENCE

---

### PROUD OF OUR WORK

Supply, installation and commissioning of a 220 kV high voltage electric power transmission line in the municipalities of Puerto Wilches and Cantagallo, crossing the Magdalena River to feed the south of the Department of Bolívar with Empresa de Energía de Santander.

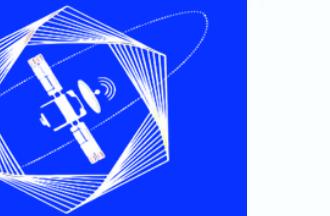

Supply and construction of civil works, assembly and installation, testing and commissioning of inductive reactive compensation bank of 1,200 KVAR - 220 KV ALSTOM brand for compensation of high voltage transmission line, external type, for Field 038 of Ecopetrol's Mares Management in the Municipality of Centro Santander.

---

# 3. EXPERIENCE

---

## PROUD OF OUR WORK

Engineering, staking out, supply, construction and configuration of crude oil transportation facilities, associated with the infrastructure optimization project for the centralized operation of Ecopetrol's crude oil stations - SCADA crude oil.

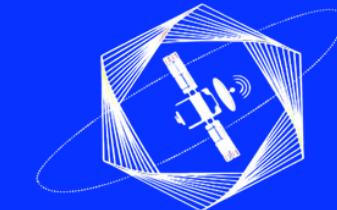

---

## 3. EXPERIENCE

---

### PROUD OF OUR WORK

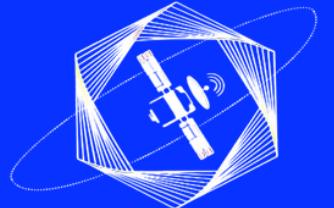

Construction of armored and modular military bases for different battalions and brigades of the Colombian Army's Air Assault Aviation Division.

Construction of Hangar (including supply of ETAA equipment-ground aviation support equipment) for the Aviation Maintenance Battalion of the Tolemaida National Operations and Training Center of the Colombian Army's Air Assault Aviation Division.

---

### 3. EXPERIENCE

---

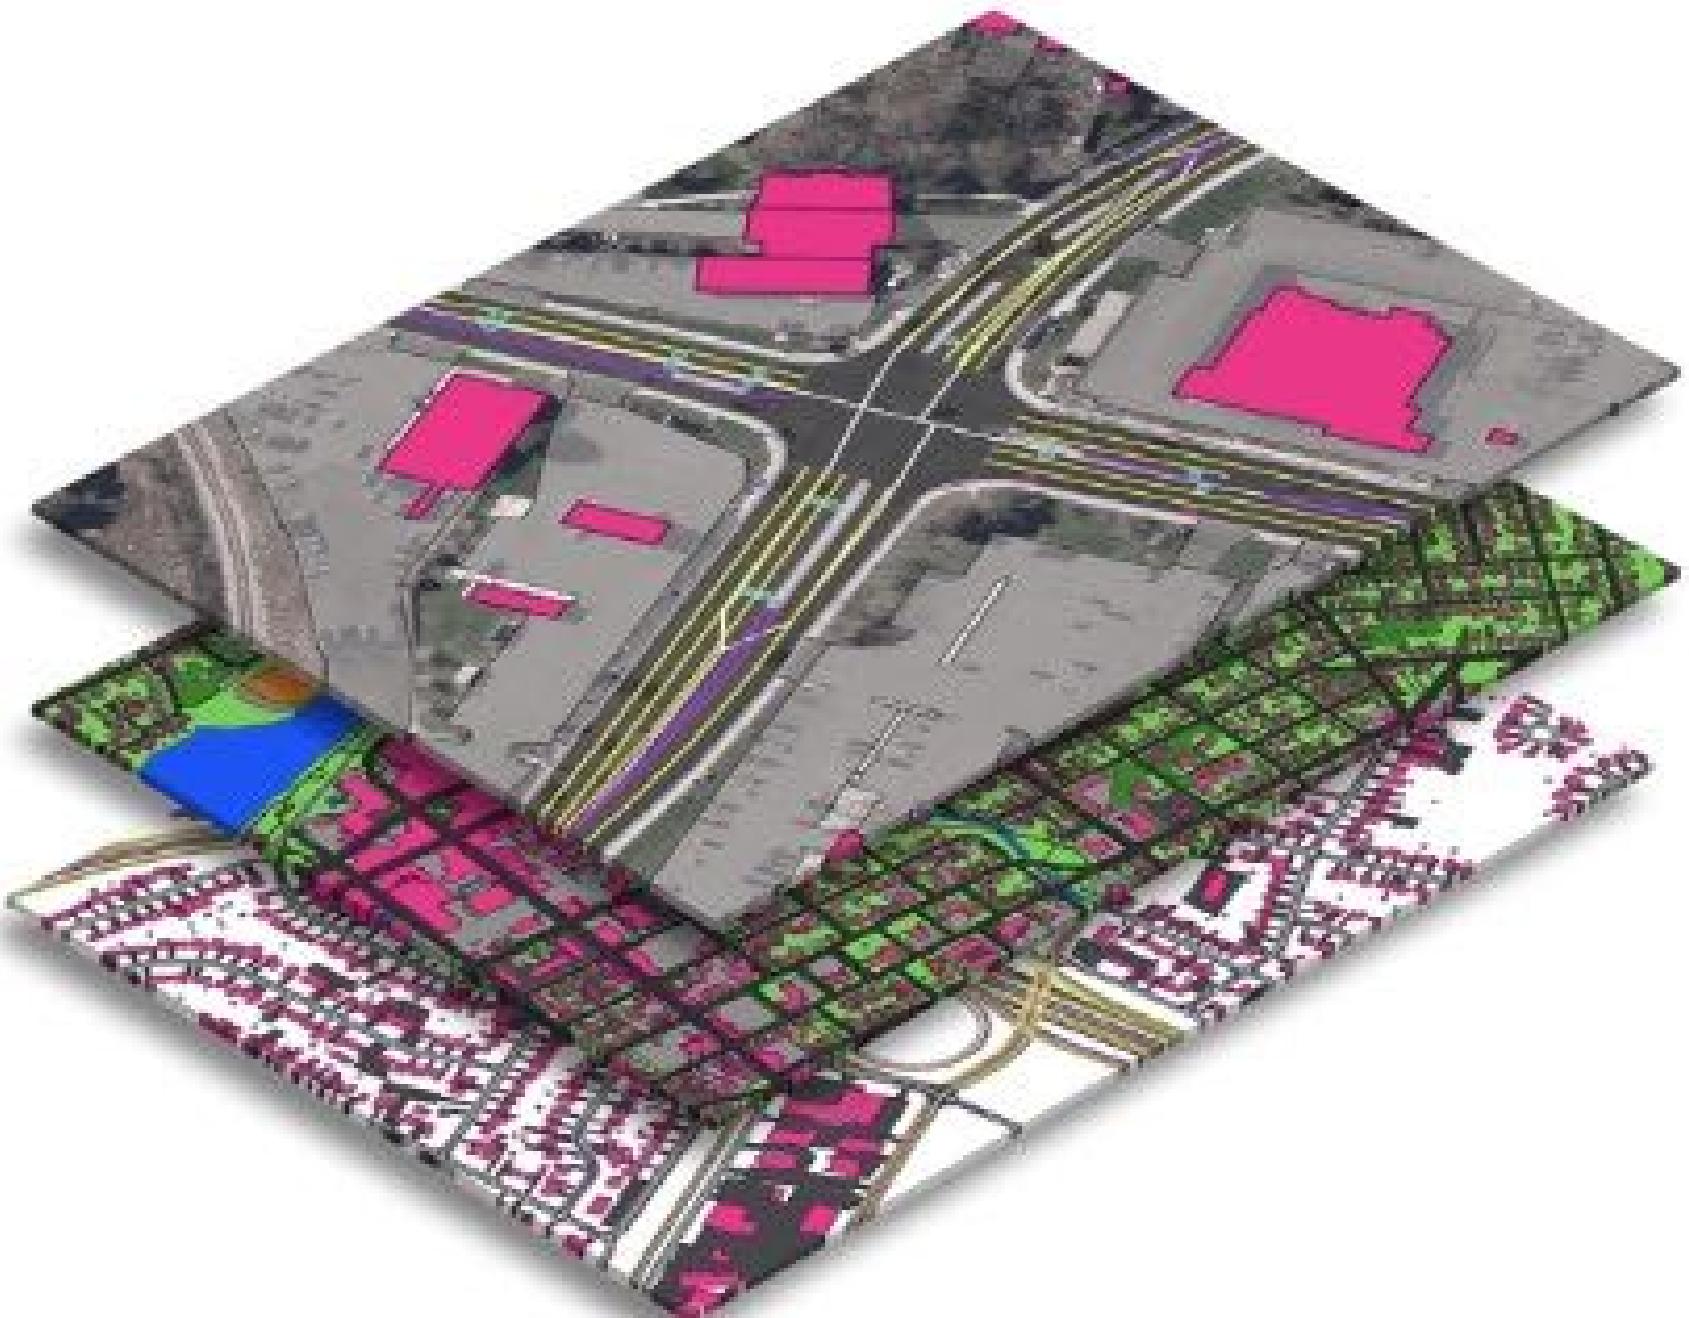

#### PROUD OF OUR WORK

Elaboration of the technical-economic model for the operation and rendering of the public cadastral service with a multipurpose approach according to the international standard ISO 19152 LADM (Land Domain Management Model).

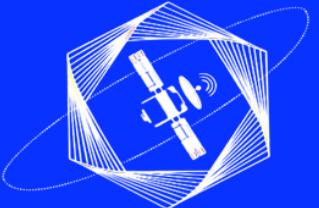

Elaboration of technical-economic models for the operation under the concession model of infrastructure, airports and seaports.

---

## 4. OPERIBUS SCOPE

---

### Mixed Economy Companies

**OPERIBUS' "main" vehicle for management and legal action.**

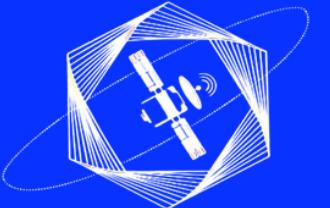

The **OPERIBUS - GEO Business Group** will use with the Governments of Bolivia (initially), Panama and Salvador, the Mixed Economy Company model as the "main" vehicle of legal contractual performance for the assignment of the Businesses. The mixed economy companies to be used will be constituted with the highest Governments, avoiding that they are constituted with territorial entities or of second order of Government hierarchy.

Among the many advantages, from the financing point of view, this modality receives support from two different and complementary sources. On the one hand, the support of the State, and on the other hand, private agents acting as investors in the private sector.

**OPERIBUS** has taken into account that the businesses contained in its portfolio have been structured on the assumption that the Public Party (the Public Client - State) has the budgetary availabilities; in a very near second stage OPERIBUS will incorporate in the scope of its management and its proposals the offer of financial leverage to the Governments, financial leverage in addition to "doing technical".

---

## 5. BUSINESS IN BOLIVIA

**OPERIBUS**, as a result of positive experiences of previous years with the Bolivian Government, is currently managing a new mixed economy company (in addition to one already established in previous years) to serve as a legal and contractual vehicle for the development of important businesses in Bolivia, mixed economy company that is estimated to be constituted in a period of 4 months from the moment of the beginning of administrative operations in Bolivia (the Governmental managements are already done). The founding partner of OPERIBUS has extensive experience in structuring and underwriting joint ventures with governments (mainly at the high government level).

This mixed economy company with the Bolivian Government will take into account in its object and scope the broad corporate purpose of the OPERIBUS - GEO Business Group, and will be empowered from a practical point of view to develop any type of OPERIBUS Business with the Bolivian State.

## 5. BUSINESS IN BOLIVIA:

### Object:

Studies, design, assembly and start-up of the solution for urban solid waste (USW) for the Department of Cochabamba, including the capital Cochabamba and the 6 municipalities of the Department:

### Scope:

- Studies and design of the industrial plant for the processing of MSW (solid urban waste).
- Construction of the industrial plant for material separation and recycling of MSW (urban solid waste).
- Construction of the MSW (municipal solid waste) industrial waste processing plant.
- Waste collection and transportation for final disposal (trucks, containers, etc.).
- Urban maintenance activities, street sweeping, pruning and trimming of trees, maintenance of street furniture in parks and bus stops.

**Contract Term:** 25-year concession.

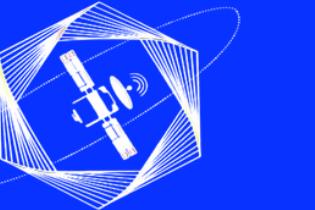

The mixed economy company as a contractual legal vehicle for the development of business in Bolivia will allow OPERIBUS to carry out (practically) any type of business, in any sphere of activity and for any amount.

In addition to this MSW (municipal solid waste) business in Bolivia, it is important to highlight that this nation has excellent business opportunities in several strategic activities, with a solid and stable economy.

## 6. BUSINESS IN PANAMA

---

### Panama

**Purpose:** Design and implementation of the Cadastre with a Multipurpose approach (First Phase of 60% of the Territory).

**Scope:** Cadastre; Cartography; Geodesy; Geography; Hydrography; Agrology; Administration, management and operation of spatial data infrastructure.

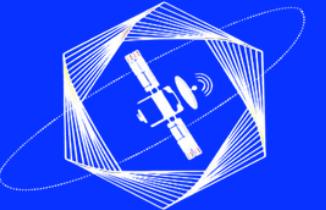

**Contract Term:** 25-year concession.

---

# 6. BUSINESS IN PANAMA

---

## Panama

**Objective:** Maritime Tracking Information Management with Satellite Geo-Information Systems.

**Scope:**

- Remote Monitoring of Vessels in Motion active cargo.
- Remote monitoring of Vessels in motion machine - vessel.
- Remote monitoring of vessels in channel approach area, arrivals or departures, maneuverability, positioning in critical areas, electronic chart navigation.

**Contract Term:** 25-year concession.

---

# 7. BUSINESS IN THE SALVADOR

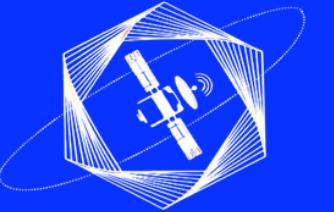

## Salvador

OPERIBUS has decided to advance in market research and review of business opportunities to be developed in El Salvador, taking advantage of the relationship established with some of the Ministers of the Salvadoran Government and the positive approval of the Government of El Salvador to the decentralized Financial World DeFi and Blockchain Technology.

The figure that OPERIBUS is in the process of implementing with the Salvadoran Government is, as in the case of Bolivia and Panama, the subscription of a Mixed Economy Company, which will serve as a contractual vehicle for the direct assignment of any business.

An initial market study conducted by OPERIBUS in El Salvador revealed huge business opportunities for the provision of all types of public services (health, telecommunications, gas, water, electricity, street lighting, sanitation, garbage, etc.), including the tokenization of goods and assets.

"Tokenization is the world's greatest technological bridge for social and financial growth"

 GM Holding

---

# \$GEO token

# GEO

# 8. DESCRIPTION AND SCOPE OF THE TOKENIZATION PROPOSAL

---

## 8.1 AN OPPORTUNITY

OPERIBUS has decided to tokenize a portion of its projected revenues by converting them into digital assets.

OPERIBUS presents to the market of investors of the decentralized financial system DeFi a great opportunity (offer of participation) to acquire property rights to a part of the projected profits of the OPERIBUS - GEO Business Group.

For OPERIBUS, each token issued is a unit of value that it has created as an organization to improve and strengthen the governance of its business model, giving third parties more power to interact with its operations while facilitating the distribution and sharing of profits and benefits among all of its investors.

# 8. DESCRIPTION AND SCOPE OF THE TOKENIZATION PROPOSAL

---

## 8.2 BENEFITS FOR INVESTORS

In line with the solutions offered by blockchain technology it happens that tokens are digital and tradable financial instruments, with among the following benefits:

**Improves liquidity levels:** Enables potentially more liquid assets, near-instantaneous settlement and seamless peer-to-peer transactions.

**Ease of sale:** Allows investors to sell their shares through secondary markets, such as decentralized exchanges that bridge and distribute a global network of investors.

**Immutability:** Security in favor of investors.

**Transparency:** Traceability of asset history.

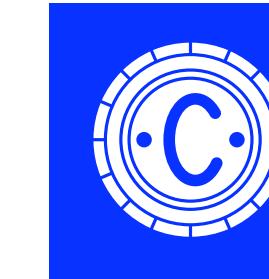

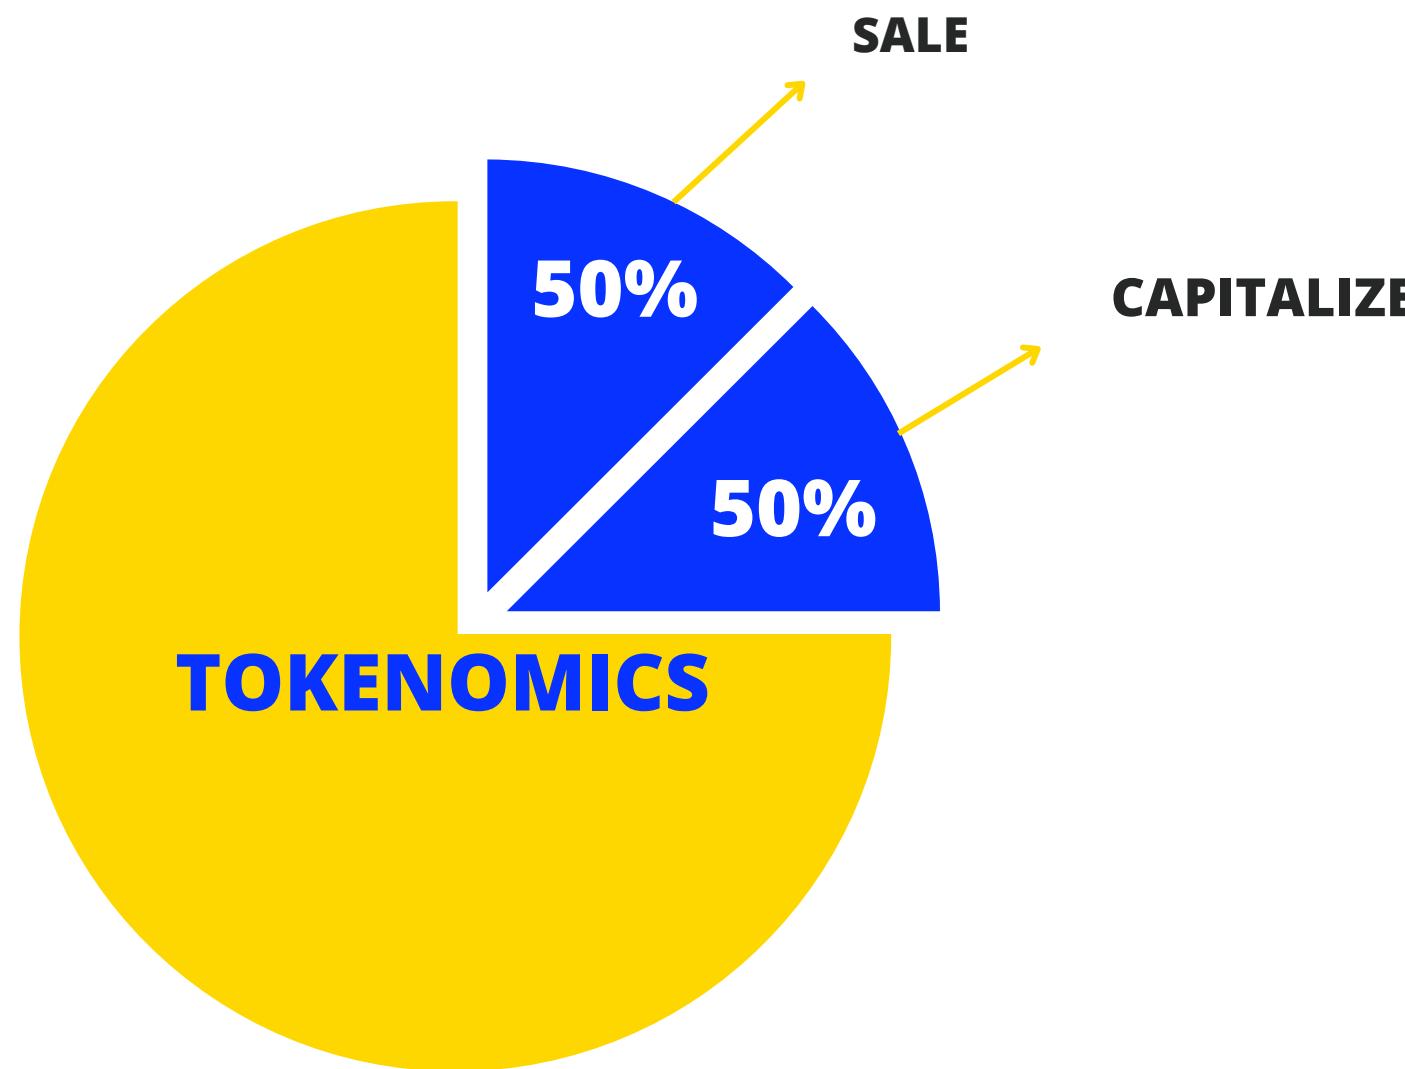

**Increased profitability:** Blockchain is a decentralized database that allows peer-to-peer transactions without the need for intermediaries, significantly reducing costs compared to current rates. The issuance of tokens can program the behavior of assets and automate the payment of dividends or interest to investors, resulting in lower costs and higher profitability.

**Diversifies the portfolio:** It personalizes and provides security by diversifying the company's portfolio in different assets.

---

# 8.3 SPECIFIC CHARACTERISTICS OF TOKENIZATION

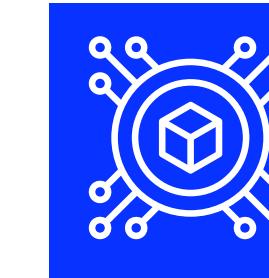

## TOKENIZATION

**Tokenized Productive Assets**

**OPERIBUS TOKEN \$GEO**

Oxe862905cC768A85E38Eb4662Ea2dfF2821aab96d

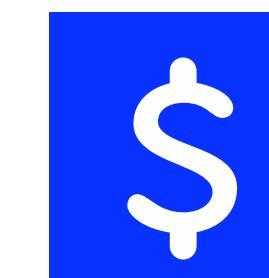

**Blockchain**

**BNB Chain (Binance)**

**Supply Max**

**1.000.000 \$GEO**

**Colateral Digital**

**\$USD**

**Capitalization**

**30% de las utilidades de OPERIBUS**

## 8.3 SPECIFIC CHARACTERISTICS OF TOKENIZATION

---

**\$ GEO**

OPERIBUS BUSINESS GROUP

**AMOUNT OF TOKEN ISSUED.** The amount of issued tokens is limited, no more will be issued in the future. Each issued token has only one decimal place, which allows it to be divided into 10 parts each, unlike market tokens that have more than 8 decimal places, making it very difficult to capitalize them and give them their real value.

**QUALITY OF TOKEN OWNERS.** The owners of \$GEO are decentralized partners of our OPERIBUS - GEO Business Group.

**LIABILITY FOR CAPITALIZATION OF THE TOKENIZED ASSET.**

Our OPERIBUS GEO Group is the main responsible for the capitalization of the OPERIBUS TOKEN \$GEO tokenized asset.

**USABILITY OF THE TOKENIZED ASSET.** The \$GEO Holders will increase their value through the business conducted by the OPERIBUS - GEO Business Group.

**SMART CONTRACT.** 0xe862905cC768A85E38Eb4662Ea2dfF2821aab96d

---

## 8.3 SPECIFIC CHARACTERISTICS OF TOKENIZATION

---

### **PERCENTAGE (%) OF PROFIT WITH WHICH THE OPERIBUS - GEO GROUP OF COMPANIES WORKS:**

The hypothesis (the starting point for planning and structuring) of business profit is estimated at between 14% and 18%, in order to weight the proposed participation in the capitalization of OPERIBUS TOKEN \$GEO - Decentralized Partners moderately.

### **PERCENTAGE (%) OF NET INCOME FOR THE CAPITALIZATION OF ASSETS:**

30% of the OPERIBUS - GEO Group's business profits will be allocated to the DAF (Decentralized Autonomous Fund) in order to guarantee the capitalization and liquidity of OPERIBUS TOKEN \$GEO assets.

### **HOW OFTEN THE DAF WILL BE FED FOR CAPITALIZATION AND LIQUIDITY OF ASSETS:**

First distribution of profits in June 2.023, thereafter the stated percentage of profits will be added to the DAF each quarter as liquidity to the Partners' token in the DeFi market.

---

## 8.4 FINANCIAL PROJECTION OF OPERIBUS TOKEN \$GEO ASSETS

PRIVATE SALES

**\$500.000 USD**

OFFER OF PARTICIPATION

**\$GEO AVAILABLE:** 500.000

---

If you Buy \$GEO you receive 5% CashBack, once the sale of the 500,000 Tokens is completed, the value of the token can start increasing in value considerably.

After the Private Sale, accessing the token will only be possible through the available Web3 exchanges, buying or selling from your Digital Wallet, Trust Wallet, Binance Wallet or Metamask.

Every purchase or sale of \$GEO creates a fluctuation in value and dollar liquidity for \$GEO. Operibus will increase the liquidity of the token each month through the settlement of completed projects and concessions.

Users have the autonomy to buy and sell \$GEO at any time through the DAF (Decentralized Autonomous Fund) developed on blockchain for digital trade automation.

## 8.4 FINANCIAL PROJECTION OF OPERIBUS TOKEN \$GEO ASSETS

PROJECTION

DAF CAPITALIZATION

30% of the Company profits

BASED ON EARNINGS PROJECTED FROM THE  
COMPANY'S OPERATIONS.

VALORIZACION

DOLLAR CAPITALIZATION

OPERIBUS TOKEN \$GEO

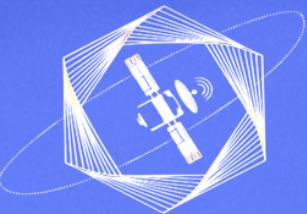

DAF (DECENTRALIZED AUTONOMOUS FUND) IS A FUND TO  
ACCUMULATE DOLLARS AS COLLATERAL FOR \$GEO.

**TOKENS DO NOT MAGICALLY  
INCREASE IN VALUE.**

**WE TOKENIZE A PRODUCTIVE ASSET**

---

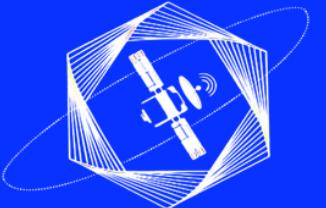

# TOKENIZATION

Anyone in the world with internet access is free to leverage OPERIBUS trades, by obtaining \$GEO you become a decentralized partner of the trades made in the future.

---

# 8.5 SHEET ROUTE 2.023

JANUARY 2.023

Private sale \$GEO, presentation of the offer of participation.

APRIL 2.023

Opening of a Mixed Economy Company in Panama.

JUNE 2.023

First Profit Distribution as of this date, profits will be added to the DAF each quarter.

MARCH 2.023

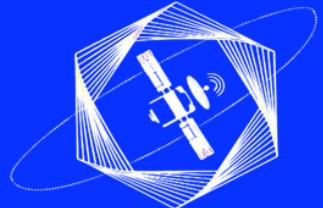

Opening of a mixed economy company in Bolivia.

MAY 2.023

Opening of a mixed economy company in El Salvador.

## 8.6 ALLIES

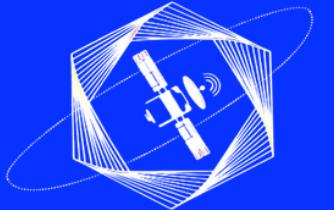

---

**OPERIBUS** is a Company that provides integral services in projects and specialized solutions, conceived towards the unity of purpose of a large Business Group, OPERIBUS Grupo Empresarial - GEO. Strategic allies:
